

Pharmacy Systems

Simply fill better.

Now you can simplify the refill and pick-up of multiple prescriptions for patients with chronic health conditions. PharmacyRx and Pharmaserv pharmacy management systems offer built-in medication synchronization (med sync) directly within their workflow. While EnterpriseRx pharmacy management system users can take advantage of integration with Ateb's Time My Meds® Med Sync Program.

MPS pharmacy management systems, along with their Med Sync programs, can help your patients improve their medication adherence while allowing you to increase prescription processing efficiency.

Synchronize your patients' medications to improve adherence and increase efficiency.

With Med Sync Programs, you can:

- Identify and create a list of eligible patients to enroll in the program, as well as automatically screen patients for follow-up contact
- Synchronize medications for patients with multiple prescriptions to be picked up on the same day of the month or mailed in one package
- Improve health outcomes for patients with multiple medical conditions and increase adherence performance ratings for your store
- Increase efficiency through scheduled prescription pick-ups or deliveries, patient counseling during scheduled appointments and optimized inventory management
- Promote customer satisfaction and loyalty through convenient prescription pick-up
- Run reports that measure and analyze patient enrollment, adherence performance and opportunities for further patient intervention

Please contact us at **866.682.8942** for more information.
You'll fill better in no time.
