Internship / Job Opportunities

Who We Are

McKesson Provider Technologies is the leading provider of software, hardware, automation, services and consulting to hospitals, physician offices, and home health and hospice agencies. We are part of McKesson Corporation, a company that delivers vital medicines, medical supplies, information technology and automation solutions that touch the lives of millions of patients each day in every healthcare setting. Since 1833, McKesson has been revolutionizing healthcare to make it more cost effective, while also improving the quality of care. With revenues in the billions, we are consistently in the top 20 of the Fortune 500.

McKesson Provider Technologies internships are available in:

- Alpharetta, Ga. (our corporate office in an Atlanta suburb)
- Boulder, Colo.
- Pittsburgh, Pa.

Internship Opportunity

Our internship program gives undergraduate and graduate students an opportunity to experience the healthcare IT industry first-hand. Through project-based work, as well as hands-on experience, you will be exposed to many aspects of the business that will draw upon your skill set. Further, you will work in a team-based environment that provides a network of support. The McKesson Provider Technologies Internship Program provides a comprehensive and customized experience that guides, challenges and develops you professionally.

Key Components

Project: During your internship, you will complete a well-defined project that your reporting manager will develop and spearhead. You also will share project results and learning outcomes during a formal presentation to management.

Ongoing support: You will be assigned a manager and peer mentor who provide departmental, product and/or services knowledge, methodologies and resources, as well as job-related assistance. Their goal is to help you maximize your success, learning and development. You will also have access to the resources provided by the HR Internship Program Manager.

Enrichment events: You will participate in enrichment events that focus on specific aspects of our business, including group meetings, organizational tours and employee events.

Professional training and development: McKesson will offer you a wide range of professional and developmental opportunities to maximize your personal and professional effectiveness. Topics include legal compliance training, time management, business writing, effective presentation skills and an overview of the healthcare industry.

Community activity: In some offices you may have the opportunity to experience McKesson's strong commitment to the community by participating in a volunteer project.

Qualifications

McKesson Provider Technologies offers paid internships that are open to full-time students enrolled in an undergraduate or master's degree program at a domestic, accredited university or college. Interns are required to work full-time for 10 weeks and complete a well-defined project in areas such as project management, software engineering, product and technical support, implementations, finance, human resources or marketing.

We seek students majoring in such areas as:

- Computer Science/Computer Engineering
- Information Services/Information Technology
- Industrial Engineering
- Health Systems/Health Information Management
- Finance/Accounting
- Marketing
- Business Management
- Mechanical Engineering
