

# EnterpriseRx for Large Retail Pharmacies

## At A Glance:

### Functionality:

- Real-Time, Next Generation, SaaS Chain Management Solution
- Centralizes Data, Reporting, Pricing and Drug Updates
- Login from Virtually Anywhere at Anytime
- Enterprise-Wide Workflow and Load Balancing
- Eliminates Costly In-Store Hardware, Backups and Software Upgrades

### Benefits:

- Optimizes Patient Care
- Improves Profitability
- Increases Efficiency
- Advances Manageability

McKesson Pharmacy Systems' EnterpriseRx is a fully integrated and centrally hosted Software as a Service (SaaS) pharmacy management solution. Designed by pharmacists with real-world experience, EnterpriseRx is built entirely from the ground up utilizing the latest technology standards to provide the flexibility, operational control, reliability and support needed to reduce costs and streamline administrative tasks. At the same time, EnterpriseRx has the capability to positively impact sales and patient satisfaction.

With the SaaS model, users connect to the centrally hosted system over the Internet with our secure networking technology. EnterpriseRx has the scalability and infrastructure to manage 70 prescriptions per second and more than one billion transactions in a single centralized database. Our state-of-the-art architecture maximizes profits by integrating resources and information across the entire enterprise including corporate headquarters, retail stores, central fill and central processing centers for reporting and management of administrative functions. Through the shared database, EnterpriseRx helps improve patient safety, lower per-prescription fill costs and drive consistency across the organization. Regardless of your size, business model, or your plans for growth, EnterpriseRx will meet your needs today and tomorrow.

Livonia, MI 48150

## Benefits

### Advances Manageability

EnterpriseRx is a comprehensive system that includes premium features like robust reporting, Enhanced Refill Processing (ERP), and workflow capabilities along with inventory and database management. Select value-adding products such as Point-of-Sale, Workload Balancing, Central Fill and Data Hosting can also be added for an extra fee.

Workload Balancing enables operations to become more cost-effective while enhancing customer service.

- Shift orders to facilities where they can be managed most efficiently
- Enables pharmacies to perform "virtual" work on behalf of other facilities, as if the users were located in that pharmacy
- Allocates appropriate tasks to the pharmacy technician, decreasing administrative workload of pharmacist

Inventory Management provides the ability to manage inventory at the store and enterprise level, resulting in better cash flow and fewer outages.

- Eliminates costly medicine outages and overstock
- Brings together pricing, drug updates and advanced inventory allocation tasks at the management level
- Saves time by establishing automatic reorder points based on historical data and min/max ordering parameters

With ERP, patients who elect to enroll will have refills generated automatically for prescriptions that meet certain client-specified eligibility rules. When the ERP refill is ready, the system can notify the patient via an automated method.

### Improves Profitability

- Handle an increase script volume without adding additional pharmacy staff
- Access enterprise-wide data to build and run meaningful analysis, leading to better decision-making
- Eliminate costly in-store hardware, backups and software upgrades
- Reduce system management overhead with optional hosting services
- Reduce will call inventory by tracking prescriptions not picked up by store customers and returning to stock

### Increases Efficiency

- Publish critical data in real-time, from a central location for immediate availability to all facilities
- Minimize errors and delays via electronic communication with physicians regarding refill requests
- Capture and store patient signatures for Rx pick-up, counseling acknowledgement, HIPAA acceptance, third-party logs, and Easy-Open caps with the optional signature capture device
- Optimize training via a wide range of complimentary tools and methods

### Emphasizes Patient Care

- Allows pharmacist to focus on customers and value-added services to enhance competitive position
- Reduces errors via the integrated workflow, accuracy scan & verification station
- Maintains common patient data across all locations to enable flexible drop-off and pick-up alternatives
