

EnterpriseRx™ for Health Care Systems

At A Glance:

Functionality:

- Real-Time, Next Generation, Centrally Hosted Chain Management Solution
- Centralizes Data, Reporting, Pricing and Drug Updates
- Login from Virtually Anywhere at Anytime
- Enterprise-Wide Workflow and Load Balancing
- Eliminates Costly On-Site Hardware, Backups and Software Upgrades

Benefits:

- Optimizes Patient Safety
- Improves Profitability
- Increases Efficiency
- Advances Manageability

McKesson Pharmacy Systems' EnterpriseRx is a fully integrated and centrally hosted (Application Service Provider -ASP) pharmacy management solution designed specifically for regional/national chains and health system pharmacies. EnterpriseRx is a next generation solution, built entirely from the ground up utilizing the latest technology standards to provide the flexibility, operational control, reliability and support needed to reduce costs and streamline administrative tasks while simultaneously positively impacting sales and patient safety.

With the ASP model, users connect to the centrally hosted system over the Internet with our secure networking technology. EnterpriseRx has the scalability and infrastructure to manage 70 prescriptions per second and over one billion transactions in a single centralized database. Our state-of-the-art architecture maximizes profits by integrating resources and information across the entire health system, central filling and administrative centers for reporting and management of billing functions. Through the shared database, EnterpriseRx helps improve patient safety, lower per prescription fill costs and drive consistency across the organization. Regardless of your size, business model, or your plans for growth, EnterpriseRx will meet your needs today and tomorrow.

Benefits

Advances Manageability

EnterpriseRx is a comprehensive system that includes premium features like robust reporting, workload balancing, central fill and workflow capabilities along with inventory and database management. Select value-adding products such as Point-of-Sale, Data Hosting, and Supplemental Training can also be incorporated for an additional fee.

Workload Balancing provides exception management processing that allows operations to become more cost-effective while enhancing customer service.

- Shift order processing to facilities where they can be managed most efficiently
- Enables pharmacies to perform "virtual" work on behalf of other facilities, as if the users were located in that pharmacy
- Allocates appropriate tasks to the pharmacy technician, decreasing administrative workload of pharmacist

Inventory Management provides the ability to manage inventory at the pharmacy and facility level, resulting in better cash flow, fewer outages, and simplified maintenance and control.

- Eliminates costly medicine outages and overstock
- Brings together pricing, drug updates and advanced inventory allocation tasks at the management level
- Saves time by establishing automatic reorder points based on historical ordering and min/max ordering parameters

Improves Profitability

- Increases script volume without adding additional pharmacy staff
- Accesses enterprise-wide data to build and run meaningful analysis, leading to better decision-making
- Eliminates costly on-site hardware, backups and software upgrades
- Reduces system management overhead with optional hosting services
- Reduces will call inventory by tracking prescriptions not picked up by patients and returning to stock

Increases Efficiency

- Publish critical data in real-time, from a central location for immediate availability to all facilities
- Minimize errors and delays via electronic communication with physicians regarding refill requests
- Optimize training via a wide range of complimentary tools and methods, including Computer-Based Trainings (CBTs), Train-the-Trainer, Administrator Training, Web-Based Training, Go-Live Support, and a comprehensive on-line document library (ODL)

Emphasizes Patient Care

- Allows pharmacist to focus on patients and value-added services to enhance competitive position
- Reduces errors via the pharmacy workflow, accuracy scan and verification station
- Publishes recall notices and alerts immediately to all locations to improve crisis response
- Maintains common patient data across all locations to enable flexible drop-off and pick-up alternatives
