

Printing Services Combo Labels

The diagram illustrates a printing label layout with the following sections:

- Form# CL141** (top left header)
- Logo Area** (top left main section)
- Feed** (top center section with up/down arrows)
- McKESSON PRINTING SERVICES - 1-800-521-1758 X550** (top right header)
- Logo Area** (middle left section)
- RECEIPT** (middle center section)
- Logo Area** (middle right section)
- DUPLICATE RECEIPT** (middle far right section)
- Logo Area** (bottom section)

A label format is available that also includes Patient Information Leaflet (PIL) information. Using this combination label and PIL format minimizes the matching process of placing the correct PIL with the correct Rx label.

In addition to accommodating the combo label format, the overflow PIL information is routed from Pharmserv to another printer or printer tray using plain paper stock.

Currently this label format is available only for customers running Pharmserv Version 3.1.0 and above.
