

# Signature Center

## At A Glance:

### Functionality:

- Capture & Store Electronic Signatures
- On Demand Retrieval & Reporting Capabilities
- Bar Code Scanning
- Updates Rx Tracker Status
- Fully Integrated with Pharmaserv®

### Benefits:

- Increase Efficiency
- Advance Manageability
- Enhance Patient Care
- Boost Technical Capacity

Eliminate the hassle of manually tracking patient signatures in your pharmacy with McKesson Pharmacy Systems' electronic signature capture solution, Signature Center™ and you'll instantly benefit from our latest technological innovation right at your fingertips.

Signature Center will help you manage your administrative responsibilities by automating the capture, storage and retrieval of patient signatures for third party logs, acknowledgement of HIPAA privacy practice notices, and patient counseling decisions, leaving you with more time to spend on other valuable matters.

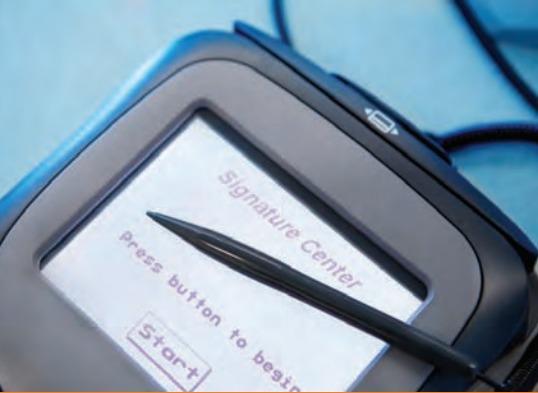

Signature Center is fully integrated with Pharmaserv and shares a single database and server platform, thereby eliminating multiple data storage systems and interfacing. Customers with Rx Processing can also take advantage of Rx Tracker Management & non-safety cap functionality.

## About MPS

With a wide array of solutions that **provide superior performance, functionality, and world-class support**, our complete portfolio can aid the entire pharmacy. Depending on individual business needs, a pharmacy management system along with its underlying platform can be chosen that will best address key drivers. Our cutting-edge technology solves the needs of community, chain, hospital, clinic, and long-term care pharmacies in all 50 states.

## McKesson Pharmacy Systems

30881 Schoolcraft Road  
Livonia, MI 48150

## Benefits

### Increase Efficiency

Signature Center eliminates paper signature logs and storage hassles by capturing electronic signatures for:

- Receipt of third party prescriptions
- HIPAA notice of privacy practices acknowledgements
- Patient counseling decisions
- Non-safety caps

A single signature is all that is required for multiple pick ups, thereby reducing check out times.

After the signature is captured, Signature Center offers a number of time-saving capabilities:

- Quickly retrieves third party logs on demand by date, patient name, script number, or carrier
- Quickly retrieves privacy signatures on demand by patient name and date range
- Updates Rx Tracker status automatically

### Advance Manageability

After the pick-up signature is captured, Signature Center updates the Rx Tracker dispense status to complete. Using

dispense tracking in Rx Tracker allows pharmacists to:

- Streamline the prescription process by eliminating searches for completed or lost prescriptions
- Manage inventory better and 'return to stock' any prescriptions that are filled but never picked up
- Improve customer service by notifying patients of prescriptions that are ready for pick up

### Enhance Patient Care

- Ensures accuracy of prescription retrieval with bar code scanning technology
- Prompts customers for HIPAA signatures whenever a privacy policy is updated

### Boost Technical Capacity

- Streamlines the pick up process with the pharmacy's on-screen emulator
- Install interchangeable pads on a point-of-sale register, workstation, or server
- Attach multiple signature stations to multiple clients to spread around the pharmacy
