

Data Station

- Maintains an extensive record of events
- Provides complete access to historical data
- Eliminates need for printing and storing hard-copy reports
- Safeguards data
- Provides automatic archiving capability
- Supports HIPAA auditing by recording access to health information in McKesson automation products

Reliable Data Archiving and Retrieval

McKesson's Data Station™ captures and accurately maintains historical data that's critically important when hospitals need to report on specific events and/or records. This comprehensive archiving tool allows Pharmacy and IT personnel to effectively store, search and retrieve historical data, supporting Drug Enforcement Administration (DEA) dispense tracking and HIPAA event logs.

Data Station

Product Specifications

System/Components

- Integrated Desktop PC with CD-RW drive
- Windows 2003 operating system
- Secure login and access to system
- SQL Server database

Dimensions and Weight:

Height: 43.9 cm (17.3 in)
Width: 19.8 cm (7.8 in)
Depth 50.0 cm (19.7 in)

Weight: 19.1 kg (42 lbs)

Data Station II

System/Components

- Requires Connect-Rx Flexible Platform
- Desktop PC

Dimensions:

Height: 11.4 cm (4.5 inches)
Width: 39.9 cm (15.7 inches)
Depth 35.3 cm (13.9 inches)

Weight: 10.4 kg (23 lbs)

Unmatched Functionality Provides Increased Reliability

Data Station allows users to safely store and retrieve important information that satisfies retention requirements by state and federal agencies. Essential historic information from McKesson automation solutions is stored in one place, rather than several different places, for easy and efficient retrieval.

Data Station automatically maintains system transaction data in real time, including:

- Medication usage data, including: dispense, return, waste, expiration, and restock detail
- Narcotic event tracking
- Discrepancy events
- HIPAA Audit events
- Pharmacy checking events

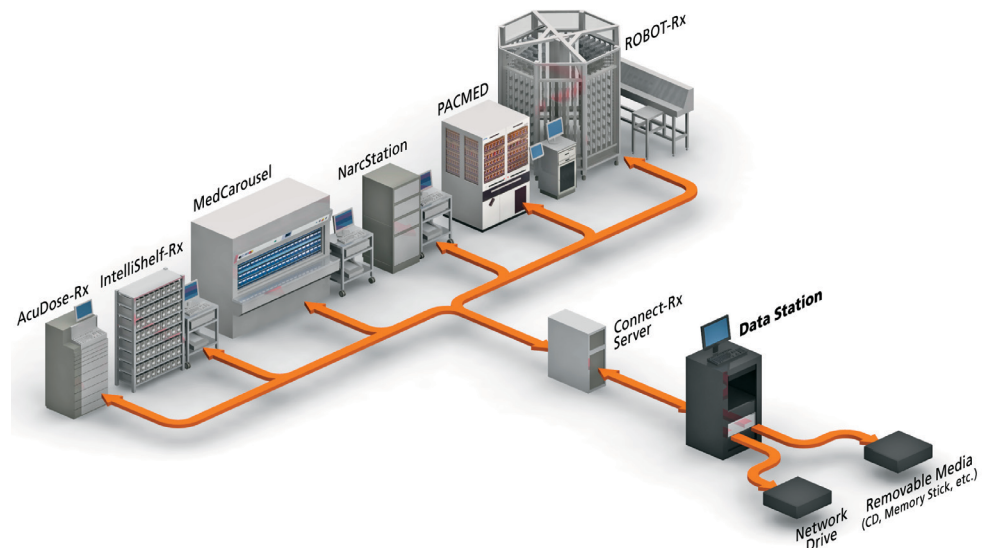

The system also provides added reporting capabilities for AcuDose-Rx®, IntelliShelf-Rx™, MedCarousel®, NarcStation™, PACMED™, and ROBOT-Rx®.

Archiving Capabilities

Users can archive data to CDs, flash drives, other media, or hospital network storage locations. An auto archiving feature allows the user to program the data to be archived at a fixed time, i.e. monthly, to the network drive. That means there is no user intervention required.

Data Station II

Data Station II provides the same great functionality as Data Station and is recommended for users who only need to archive to a network drive.
