

Web Reporting for ANSOS One-Staff™

Benefits

- Facilitates productivity transparency across the enterprise with dynamic data updates
- Enables critical analysis of patient care hours and costs associated with workload
- Pinpoints areas of concern with drill-down reporting
- Provides ability to run reports as scheduled or on-demand, based on reporting criteria
- Supports quick interventions in critical variances in actual, targeted and budgeted values
- Facilitates historical data retrieval for current and previous timeframes and date ranges
- Enables comprehensive productivity trending with fiscal YTD reporting

Every facility knows that productivity data is only as useful as your ability to access, analyze and leverage that data. The dynamic Web Reporting module provides hospital executives with a clear, comprehensive presentation of the staffing information collected in ANSOS One-Staff™. Graphical dashboards turn a wealth of data into a useful performance management tool, providing the ability to analyze key indicators in real time.

Respond to Current Needs

By providing access to actual workload data, the Web Reporting module enables quick assessment of current needs. Designed to show the complete picture at a glance, graphical dashboards group reports around key areas such as:

- Cost avoidance
- Hours (FTEs) and costs by summary and trend
- Hours (FTEs) and costs per statistic by summary and trend

Track Critical Variances

With the Web Reporting module, productivity issues become instantly apparent, enabling executives to intervene before variances become critical. Each report highlights the positive and negative variances

between actual, targeted and budgeted values. The productivity overview report displays these variances for three specific indicators – work hours per patient, work costs per patient and FTEs – in readable bar graphs.

Drill Down to Details

The Web Reporting module's hierarchical reporting path allows executives to move from the summary level of cross-divisional reporting to the details of shift-by-shift staffing. Complete drill-down functionality allows users to pinpoint an area of concern, viewing information from the enterprise, division and area directly through to the shifts worked per staffing level.

Compare and Contrast

Dashboards allow executives to examine current data across disciplines, viewing areas in which workload is measured differently – such as the operating room (OR) and ambulatory surgical centers – on one convenient screen. Each dashboard links to a variety of supporting detail reports, allowing for analysis at the lowest reporting level. Reports can be organized by hours, costs or FTEs, and are presented in Microsoft® Excel® spreadsheet software for easy export.

Features

- Automatic and on-demand data extraction from ANSOS One-Staff
- Real-time graphical assessment of enterprise productivity
- Complete drill-down reporting for detailed analysis
- Year-to-date and supporting detail reports
- Graphic elements including bar graphs, line graphs and hover text
- Trending analysis of productivity data across cost centers
- Dynamic timeframes to support unit processes
- Configurable report parameters for specialized reporting groups
- List of favorite reports on drop-down menu
- Enhanced security

Build Reporting Groups

The Web Reporting module displays trends in productivity data for the fiscal year to date, including reports on 33 different data elements. In addition to the groups available in ANSOS One-Staff, users may build reporting groups exclusive to the Web Reporting module — such as the intensive care units in each hospital.

Enhance Your Processes

ANSOS One-Staff data is refreshed in real-time whenever reports are run, either on-demand or according to schedule. Fiscal year configuration allows the Web Reporting module to recognize a variety of site-specific timeframes, from biweekly to the fiscal year, and to calculate costs accordingly. Rolling date ranges incorporate all changes made for a specific pay period.

For More Information

For more information about the Web Reporting module, contact your McKesson representative or call 1-800-442-6767 and press “2”.

Customize Your Security

The Web Reporting module's heightened security provides for a separate User ID and password from the base ANSOS One-Staff application. Users can change passwords within the Web application without intervention. Based upon the user's security clearance, Web Reporting presents a listing of available reports through a catalog menu.
