

McKesson Data Exchange

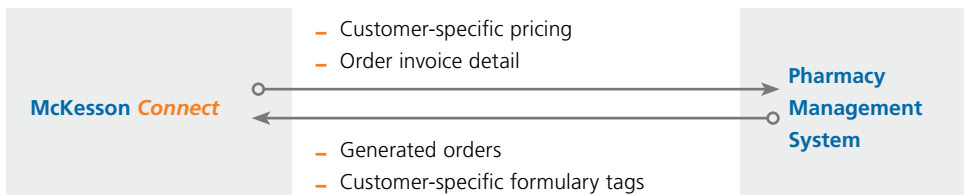

Powerful integration of your pharmacy information and supply systems

McKesson Data Exchange enables the efficient sharing of data between your pharmacy management system and McKesson's online supply management platform, McKesson *Connect*. Data Exchange integrates important information and processes that would otherwise reside in separate systems, giving your pharmacy powerful insight into — and control over — your operations.

Fast, simple data sharing

Available to all McKesson *Connect* customers at no charge*, Data Exchange is Web based and requires no software installation or on-site IT support. With a few simple steps Data Exchange allows pharmacies to export real-time information into their pharmacy management systems and consolidate supply management into one seamless process. The entire process takes only minutes each day.

Data Exchange allows both systems to share and store information, including:

Data Exchange supports integration with more than 120 third-party pharmacy management systems and automatically customizes the data formats for your pharmacy's system. There's no need to reformat your data with each export.

* Custom development required to support new pharmacy systems may carry a services fee

Hard-working data for every kind of pharmacy

Hospital and long-term care pharmacies. With information on the most recent drug prices, Data Exchange empowers institutional and health system pharmacies to more accurately determine pharmaceutical costs per episode of care, enhancing reporting and supporting better pharmacy management decisions. Formulary data shared with McKesson *Connect* can help increase purchasing compliance — highlighting those items for buyers to clearly identify.

Retail pharmacies. By more carefully tracking costs and reimbursements, retail pharmacies can optimize their purchasing and increase profitability. Pharmacies whose systems automatically generate replenishment orders can instantly transfer them to McKesson for fulfillment

Pricing and order data work together — providing a more complete picture of your pharmacy's finances

- Easily update data every day for better accuracy.
- Track customer-specific pricing.
- Eliminate duplicate order entry.
- Export data formatted expressly for your pharmacy management system.
- More accurately track costs and save money.
- Generate reports based on the latest data.
- Enhance pharmacy productivity.
- Save time consumed by manual import/export processes.

Do more with integrated data

Manage your purchasing information more efficiently by generating consistent data across both of the systems you use to manage your pharmacy. Data Exchange allows you to integrate:

Pharmaceutical pricing and information. Export current, pharmacy-specific item prices, and in some cases item descriptions and generic names, from McKesson *Connect* to your pharmacy management system for more accurate charging, cost analysis, and decision-making.

Orders. Import purchase orders from your pharmacy management system, eliminating manual re-keying of orders in McKesson *Connect*. Once imported, the PO Prepare feature in McKesson *Connect* will review orders for contract and formulary compliance, best pricing, and availability — adding the power of real-time online ordering to your pharmacy system.

Invoices. Exports of invoices and receiving information to the financial component of your pharmacy system support invoice-level payables. Additionally, the exports update inventory levels in your materials management systems to help you track perpetual inventory.

Custom export. Customize your data export depending on specific needs, and import and store your pharmacy-specific data in McKesson *Connect*, including:

- Pharmacy-specific item numbers
- Retail prices
- User prices required for pricing auditing
- Formulary preference indicators
- User package sizes
- Inventory management preferences, such as reorder points or quantities

Connect and control your data with McKesson's integration tool

Contact your McKesson representative to enable Data Exchange in McKesson *Connect* today or call **800.793.9875**.

Update your pricing every day, in just seconds

- 1. Export.** From the Data Exchange tab of McKesson *Connect*, pharmacy staff click a button to export a file containing the latest pricing information. The system automatically formats the file for compatibility with the customer's pharmacy management system, based on stored preferences.
- 2. Import.** Once the exported file is saved to a hard drive or network, pharmacy staff import the file into the pharmacy management system. The imported file automatically updates pricing and other data associated with the information stored in the pharmacy management system.
