- ✓ **Instantly track deliveries**
- ✓ **Increase patient adherence**

Medication Delivery Wherever & Whenever Your Patients Need It

Easy. Regardless of who you are or your location, McKesson's mobile delivery powered by RxTrax can help optimize a health system's bedside medication delivery service, as well as a pharmacy's mobile delivery service as a way to maximize a patient's convenience and care. It can improve patient adherence, reduce readmissions, and speed-up secured payment processing – all conveniently performed at a patient's home or bedside.

WHO and WHERE you are is not a challenge.

As a health system or Long-term care facility pharmacy...

We know how much of a benefit it is to have a beside medication delivery program. Not only does it help facilitate a patient's access to post hospitalization medications and counseling for hospitalization existing medications, it also streamlines and optimizes the tracking and payments of medication deliveries. Mobile delivery also reduces the cost of hospital care by reducing hospital readmissions associated with non-adherent patients.

As an independent or chain pharmacy...

Regardless of your size, location, or daily script volume, mobile delivery helps optimize the fulfillment and distribution of prescriptions to customers, and simplifies the entire purchasing process by allowing deliveries to be made directly to a patient's home.

Some of the highlighted benefits to you and your customers include:

- **System agnostic** - Integrates with your current pharmacy software system
- **Easy Conversion** – Converts to new technology seamlessly
- **Easy to Use** – Deliveries occur using any iOS device
- **Paperless, yet printable** – All information is easily accessible and printable via the pharmacy's secured online database.
- **GPS Enabled** – Delivery routes are organized and driver performance tracked.
- **Delivery verification and notes capture** – Quick delivery verification by capturing a recipient's driver's license / state ID photos.
- **Signature capture** – Captured signatures include HIPAA, counseling, pick-up acknowledgement, and easy open caps.
- **Transactions on the go** – Accept payments anytime and from anywhere, whether your customer is using credit card, Flexible Spending (FSA), cash, or in-house accounts.

Safe and Secure Transactions

All transactions are secure and PCI compliant using industry-leading, end-to-end encrypted devices. Data is immediately transferred to the pharmacy system with no personal data being retained on any device.

Consulting Services

Our consultative approach enables faster and smoother implementations of outpatient, long-term care facility bedside delivery programs with less trial and error, and provides a new revenue source.

Start a Mobile Delivery Program Today

Fast, convenient, and simplified. That's what you demand, and what your patients expect. So that's what we deliver. Seeing is believing, so ask your McKesson sales consultant today for a quick product demo and see for yourself how mobile delivery can help make your life easy, improve your patient outcomes, and increase your revenue.

Optimize pharmacy prescription deliveries with RxTrax technology

“The Mobile Delivery service has been very useful to our pharmacy. It saves us time at the register because we don't have to update the deliveries anymore as it is done automatically. Mobile Delivery also makes it much easier to find where deliveries are during the day in real time without having to call the driver.”
