

Pharmacy Systems

Our Point of Sale solution is an easy sell.

Too often the front-end and pharmacy are not integrated, resulting in a reconciliation burden for pharmacy personnel. Eliminate the division with Pharmaserv POS, an ideal system to enhance front-end productivity while connecting back-end pharmacy processes to maximize profitability.

Combined with your pharmacy management system, the sophisticated functionality of POS provides far-reaching benefits to positively impact your pharmacy success.

Pharmaserv POS is a comprehensive tool for promoting merchandise, tracking item movement, maintaining optimal inventory levels, and streamlining ordering and receiving of stock. Barcode scanning and fast credit checking ensure that customer checkout is quick and accurate.

Through MPS's strategic partnership with Cayan™ – a leading payment technology provider – Pharmaserv POS delivers industry-first payment processing technology. The system functions with a Cayan-supplied device to connect to the cloud-based Genius® Customer Engagement Platform®. This platform provides a wide array of services, including:

- Seamless gateway connectivity to leading U.S. processors
- Integrated EMV chip compliance technology
- NFC payment processing capability (i.e., Apple Pay, Google Wallet, Samsung Pay)
- Digital receipt management with Signature Capture
- Remote software update and support for quick deployment of new payment capabilities
- PCI compliance validated by the most current PA-DSS security standards

Accurately and securely manage the sale of goods in your pharmacy.

Additional Pharmserv POS Benefits:

Increase Efficiency

- Simplify promotional discounts and inventory management with bar-coded pricing and stock
- Reduce key stroke and pricing errors with bar-code scanning at checkout
- Identify missing prescriptions, track inventory, and identify shrinkage with automatic updates of prescription status in the integrated Pharmserv® Rx Tracker system

Drive Performance

- Management reports provide insights that help you effectively control merchandise movement, pricing, inventory, and Accounts Receivable
- Reduce data maintenance time and effort with shared Pharmserv, Long-term Care and Accounts Receivable information
- Determine peak business hours and identify top selling inventory with hourly sales reports
- Flexible report output options allow for advanced charting

Improve Profitability

- Minimize carrying costs and reduce out-of-stock situations with perpetual inventory
- Streamline private charge management and cash collection for front-end with integrated Accounts Receivable
- Find overages and shortages and view cashier activities with daily and monthly aggregate cash reports
- Our Business Services Merchant Processing group provides built-in credit and debit card processing, next day cash collection, and a single monthly statement summarizing your processing activities

Boost Customer Satisfaction

- Accept FSA and HRA payments from patients through our IIAS compliant technology
- Speed up checkout times with internet-based high-speed credit card processing and bar-code scanning
- Provide incentives to regular customers with targeted marketing and loyalty programs
- Present a professional, polished image to level the competitive playing field
