

Clinical Research Services

McKesson offers comprehensive clinical research support for phase I-IV clinical trials.

We partner with biopharma companies, investigators and academic centers to provide clinical trial distribution and dispensing services so they can focus on what's important: the investigational drug and its potential to help patients.

Our Capabilities

Choose from our configurable solutions to fit your needs and reduce your administrative burdens.

- Clinical management and support
- Distribution fulfillment
- Drug storage
- Inventory management
- Pharmacy services
- Quality control
- Product sourcing

Our Commitment

Patients come first. Their well-being is the top priority in your trials, and it's ours too. By providing cutting-edge clinical trial services, we help provide patients with better outcomes and quality of life.

Our partners have unmatched support. Our team brings more than 15 years of experience and offers expert guidance on clinical trial logistics tailored to fit the trial protocol.

We prioritize excellence. Elevated performance is critical to getting patients the trials they need. Our team performs a four-point quality check before every shipment to maintain over **99.9% shipping accuracy**.

Support for patient population sizes ranging from 20 to 5,000+

We provide what you need. Our solutions are designed to fit your trial protocols and your patient populations.

How Our Partnership Supports You

- ✓ **Launch your trial faster** with our standup time of **4 to 6 weeks**.
- ✓ **Improve the patient experience** with expert REMS management and subject counseling.
- ✓ **Robust quality** management systems.
- ✓ **Maintain security** through our electronic document management system.
- ✓ **Customized distribution.**
 - Direct-to-site or direct-to-patient delivery
 - Patient-specific or bulk-shipment capabilities
- ✓ **Optimize inventory management.**
 - Ambient, refrigerated and frozen storage
 - Investigational drug forecasting, including protocol and distribution planning
 - Inventory reporting and storage based on trial protocol

In addition to our clinical research services, we can coordinate your manufacturing needs — including labeling, packaging, over-encapsulation, and placebo manufacturing — providing you a streamlined experience.
