Lower your merchant processing rates and increase your profitability.

Regardless of your pharmacy or practice management platform, you can provide your patients with high speed payment processing that is secure & reliable.

McKesson's Merchant Processing improves efficiencies, speeds-up cash flow, and optimizes profitability by:

- Streamlining payment procedures while offering your patients more checkout convenience.
- Improving cash flow with next business day settlements.
- Accepting mobile payments like Apple Pay & Google Wallet.
- Providing consolidated monthly 'Super Statements' that save time on the reconciliation process.

Elevate your efficiency, and ensure data security, with the latest in PCI Compliant EMV capable payment processing technology.

With McKesson's Merchant Processing services, you receive the benefit of having state of the art card reader technology, allowing you to accept EMV chip cards, PIN-secured & signature debit cards, and contactless payments in a single terminal.

With terminal pads that are PCI-compliant, McKesson Merchant Processing offers a secure method for credit, debit, HSA and FSA card processing.

Accepting payment at a pharmacy, medical office or other healthcare facility? No problem, we have options available to meet your needs.

*Fully Integrated
into McKesson's
POS systems*

*Non integrated, stand alone
side terminal for pharmacies
or medical offices*

Our optional SecurePCI service offers:

- \$100,000 in Data Breach Protection to mitigate financial risk in the event of a credit card data breach or accidental disclosure of PHI
- Online tools to assess PCI compliance
- E-Learning and policy management tools to help train your staff on the handling of credit card data and meeting PCI compliance requirements.
